

Our Environmental Policy

As stewards of our Blue Planet™, Republic Services is committed to environmental protection, compliance, and continual improvement of our environmental management system across our organization. We are guardians of our environment and have a responsibility to regenerate our planet with the materials we are entrusted to handle every day by promoting increased recycling, generating renewable energy, and helping our customers to be more resourceful.

- We are committed to pollution prevention and continuously improving our environmental performance by providing safe, environmentally responsible solutions.
- Exercising the utmost responsibility in our operations, including fleet, buildings, landfill technology, maintenance, engineering, and our day-to-day activities, we strive to operate in an environmentally friendly manner to minimize impacts to air, water and land.
- Recognizing our responsibility and opportunity in managing the nation's waste, we develop innovative products and services to capture value and energy from materials in the waste stream, while minimizing their environmental impact.
- Our commitment extends to the selection and on-going evaluation of environmentally responsible suppliers, service providers, and contractors.
- These commitments are reflected in the way we do business and guided by the 5 elements of our sustainability platform: Operations, Materials Management, Communities, Safety, and People.

We believe in the preservation of our Blue Planet for a cleaner, safer and healthier world where people thrive – not just for today, but for generations to come.

Donald W. Slager
President & Chief Executive Officer
