# Scrap the scraps.

## Recycle your food waste.

The City of Benicia is part of a statewide effort to reduce emissions of short-lived pollutants and climate change by reducing organic waste disposal. It's important for residents to place all their food waste, food-soiled paper, and yard waste into the GREEN organics curbside cart.

#### 1. Pail It

Use a food scrap pail to store your food scraps. Empty the contents of the pail into your green organics cart. Call Republic Services at

(707) 747-0608 to receive one for FREE.

### 2. Line It

Line your pail to keep it clean. Use paper towels, a paper bag, newspaper, or a compostable bag. Dump everything (including the lining) into the green organics cart. You can also skip the liner and rinse the pail as needed.

#### 3. Compost It

Put fruits, vegetables, dairy products, breads, meat, seafood, food-soiled paper, and landscape waste in the green organics cart for weekly service. It will be turned into compost and kept out of the landfill.

### Other tips:

- Set your green organics cart out weekly.
- Freeze food items and add to your cart on pickup day.
- Wash your pail regularly in the dishwasher or by hand.
- Sprinkle baking soda in your pail and cart to prevent odors.
- DO NOT put plastic bags, pet waste, or compostable forks, etc., in cart.
- Compostable bags are accepted in cart if 100% compostable 6400 series. Find online, or at local hardware or grocery stores.
