

Tips to Clean Compost Containers

Cleaning your compost bin for curbside pickup:

- Please use a hose and **natural** cleaners.
- Soap can damage your local ecosystem.
- Please use vinegar, lemon, and baking soda to sanitize and deodorize the container.

These preventative measures will help keep your curbside compost bin cleaner longer:

- Line the bin with newspaper and sprinkle with baking soda to absorb moisture and odors.
- We also recommend purchasing compostable bags to hold scraps.
