

Chemical & Petroleum Manufacturing

Republic Services delivers specialized solutions built for the demands of chemical and petrochemical operations. With local expertise, national reach and a single point of contact, we help you maintain compliance and keep production running without disruption.

CHEMICAL & PETROLEUM MANUFACTURING

Republic Services is a leader in environmental services, recycling and waste.

In the fast-moving world of petrochemical manufacturing, chemical production and oil & gas operations, managing hazardous and non-hazardous waste demands precision, expertise and unwavering compliance.

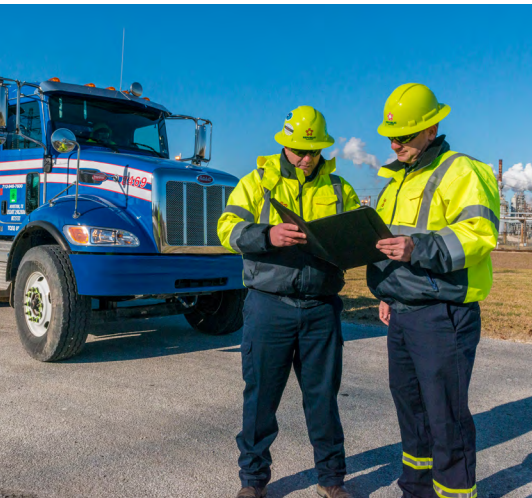

CASE STUDY

From Challenge to Solution

For years, a major national refinery in Texas struggled with the complexity of managing waste streams across multiple vendors, creating inefficiencies, service issues and administrative burden on their facility managers. Republic Services transformed waste handling by consolidating multiple vendors into one Total Waste Solutions partner.

Learn how Republic Services streamlined waste operations for this national refinery.
