# E&P Landfill Services

State-of-the-art, comprehensive oil and gas waste management, recovery, and disposal. Available from a single provider for the safest, most efficient operations.

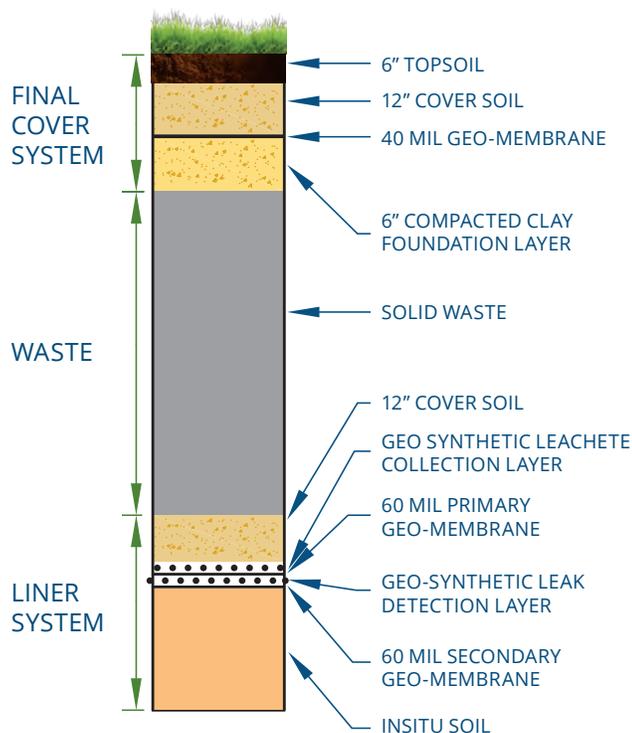

Our E&P landfills are ideally located and uniquely designed to help oil and gas companies improve their efficiency and productivity. Our safe, compliant E&P services are available 24/7.

We also offer waste profiling, onsite laboratory analytical services, extensive leak, groundwater and air monitoring systems, and rail delivery.

## We can dispose of:

- › Oil drilling waste, fracking wastewater, oil-based fluids, muds and cuttings
- › Pit liners, tank bottoms and frac sand
- › Other production-related waste

## Land Profile

## Environmental Protection is Priority #1

Republic Services prioritizes compliance, human health and environmental protection. Our landfills are Texas Railroad Commission-permitted and exceed regulatory standards with zero storm water discharge, a 6-layer liner system for disposal cells, a 4-layer system for closure caps, and an active leak detection system between liners.

## Other E&P Services

Maximize safety and operational efficiency with turnkey, bundled packages for fluids and solids waste treatment, disposal and industrial services.

### SALTWATER INJECTION WELLS

Well disposal for saltwater brine generated through oil and gas E&P

- › Flowback
- › Slurry

### TANK AND EQUIPMENT RENTAL

Rental of comprehensive equipment

- › Frac tanks and frac gas busters
- › Roll-off boxes and tarps
- › Vacuum and dewatering boxes
- › Trash trailers and rail systems

### TRUCKING

Wholly-owned fleet includes everything from winch trucks, roll-off trucks and vacuum trucks.

### DOMESTIC WASTEWATER TREATMENT

Domestic wastewater treatment facilities specifically focused on treating wastewater generated on well site locations.

# About Us

---

Republic Services is a leader in environmental services. With the acquisition of US Ecology, ACV Enviro and ECOFLO, we're now able to offer customers the most comprehensive set of Environmental Solutions from a single company. The strength and extensive experience of US Ecology in the E&P space allow us to provide customers with ideal locations for the safe disposal of their oil and gas waste.

## The Value of E&P Services

- › Single-source, comprehensive solutions provider with a large geographic footprint
- › Trained professionals
- › Safe and reliable handling to minimize risk and liability
- › Licensed and permitted transportation and disposal
- › Environmentally friendly and cost-effective
