

Exploration & Production Services

Republic Services provides single-source, turnkey waste disposal and services for oil and gas companies. We improve efficiency, productivity and safety in exploration and production (E&P) operations.

REPUBLIC[®]
SERVICES

Sustainability in Action

E&P Landfill Services

State-of-the-art, comprehensive oil and gas waste management, recovery, and disposal. Available from a single provider for the safest, most efficient operations.

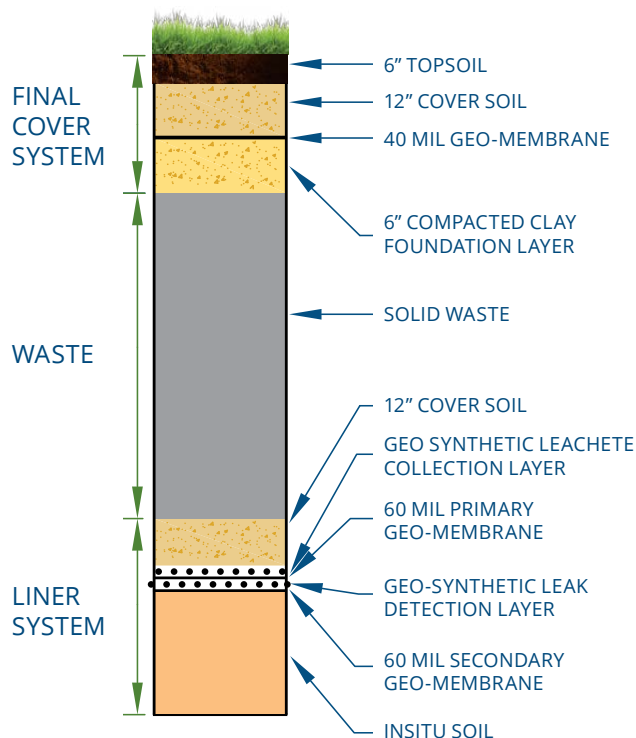

Our E&P landfills are ideally located and uniquely designed to help oil and gas companies improve their efficiency and productivity. Our safe, compliant E&P services are available 24/7.

We also offer waste profiling, onsite laboratory analytical services, extensive leak, groundwater and air monitoring systems, and rail delivery.

We can dispose of:

- Oil drilling waste, fracking wastewater, oil-based fluids, muds and cuttings
- Pit liners, tank bottoms and frac sand
- Other production-related waste

Land Profile

Environmental Protection is Priority #1

Republic Services' facilities exceed regulator standards with zero storm water discharge, a 6-layer liner system for disposal cells, a 4-layer system for closure caps, and an active leak detection system between liners.

Other Turnkey E&P Services

Maximize safety and operational efficiency with turnkey, bundled packages for fluids and solids waste treatment, disposal and industrial services.

SALTWATER INJECTION WELLS

Saltwater injection disposal for saltwater brine, flowback and slurry, generated through oil and gas E&P.

TANK AND EQUIPMENT RENTAL

Rental of comprehensive equipment

- Frac tanks and frac gas busters
- Roll-off boxes and tarps
- Vacuum and dewatering boxes
- Trash trailers and rail systems

TRANSPORTATION SERVICES

Our fleet includes everything from winch trucks, roll-off trucks and vacuum trucks.
