

Encampment Cleanup

Republic Services' professionally trained Emergency Response teams administer critical cleanup and decontamination services.

REPUBLIC
SERVICES

Sustainability in Action

Republic Services is a leader in environmental services, recycling and waste, offering more than 70 years of experience. We provide high-level, comprehensive and compliant cleanup treatment and disposal of trash, medical waste and biohazardous waste found in encampments.

Whether you need recurring cleanup on a schedule or one-time service in an emergency, we perform cleanup both inside and outside. Locations may include highways, vacant office buildings, parks, train cars and tunnels. When requested, we segregate recyclables and adhere to city and state regulations regarding temporary storage of removed personal items.

Our teams are equipped with full personal protective equipment to ensure safety and are certified to handle bloodborne pathogens and other hazardous material that may be present. When necessary, we safely perform confined space entry and have the right equipment to remove waste compliantly and efficiently.

Emergency Response

We offer both scheduled and emergency services. Our infrastructure and experience allow us to respond to emergencies within two hours of being called.

We clear about

200 ENCAMPMENTS
ANNUALLY

Single-Source Partner

Clearing encampments is just one of the services we provide. We collect recycling and waste for hundreds of communities across North America. We also own our transportation and disposal assets, making us a single-source strategic partner for all your environmental services needs.

Leaders in Safety

Even in times of emergency, we prioritize safety while caring for the environment, the public and our customers. You can depend on us for safety and compliance, reducing your risk and liability.
