

# Hazardous Waste Disposal Solutions

Republic Services offers industry-leading RCRA Subtitle C-permitted disposal capacity and capabilities for removing hazardous and non-hazardous, PFAS/PCBs or NORM/TENORM waste.

**REPUBLIC**<sup>®</sup>  
SERVICES

Sustainability in Action

**Republic Services is a leader in environmental services and offers customers comprehensive Environmental Solutions, including hazardous waste disposal.**

We have secure RCRA Subtitle C landfill disposal solutions and TSCA-licensed facilities for hundreds of EPA-regulated waste streams, including: hazardous, non-hazardous, NORM/TENORM, universal, inorganic and industrial waste. We also offer waste profiling, onsite laboratory analytical services, extensive leak, groundwater and air monitoring systems, and truck and rail delivery capabilities.

## The Value of Hazardous Waste Disposal Solutions

**Optimal solution for inorganic waste**

**Reduced risk and environmental impact**

**Safe and compliant**

**Nationwide network and extensive experience**

## Subtitle C Waste Disposal Locations

### Grand View Facility (Idaho)

- RCRA and industrial waste
- NORM/TENORM waste
- NRC-exempt and a ccelerator-produced radioactive materials
- TSCA-approved (PCBs > 50 ppm)

### Belleville Facility (Michigan)

- RCRA and industrial waste
- TSCA-approved (PCBs > 50 ppm)
- NORM/TENORM waste

### Beatty Facility (Nevada)

- RCRA and industrial waste
- TSCA-approved (PCBs > 50 ppm)

### Robstown Facility (Texas)

- RCRA and industrial waste
- NORM/TENORM waste
- NRC-exempt radioactive materials
- Thermal desorption unit provides cost-effective recycling of oil-bearing waste

### Stablex Canada (Quebec)

- RCRA and industrial waste
- PCBs < 50 ppm
- Contaminated soil and debris

### Richland Facility (Washington)

- Class A, B and C low-level radioactive waste (LLRW) disposal sites
- Serves 11 states in the Northwest and Rocky Mountain Compacts
