

Investigation Derived Waste (IDW)

Republic Services offers safe and compliant handling and disposal of investigation derived waste.

REPUBLIC
SERVICES

Sustainability in Action

Republic Services is a leader in environmental services, recycling and waste, offering customers comprehensive Environmental Solutions.

IDW refers to any solid, liquid or debris generated in the process of investigating a known or potentially contaminated site. Through our expertise and nationwide network of permitted facilities, Republic Services manages the characterization, documentation, transportation and disposal for IDW waste, ensuring safety and compliance.

Regulatory compliance
with state and federal laws

Proper analysis to determine
waste characterization
