

Metals Recovery

Republic Services offers a unique recycling solution that recovers valuable metals from liquids and solids. Metals recovery is a sustainable alternative to traditional disposal methods.

REPUBLIC[®]
SERVICES

Sustainability in Action

Republic Services is a leader in environmental services. As a technological leader in the treatment of inorganic wastes, customers turn to us for reliable transportation, lab services and metal recycling services.

We work with a network of smelters, refiners and other recycling operations to ensure the best outlet for your material. We offer reclamation of metal-bearing wastes and byproducts. Recoverable materials include silver, nickel, copper, chromium, tin and cobalt.

Nationwide treatment and disposal network

One partner from start to finish

Customized programs that fit your needs

Metals Recovery

- Plating byproducts containing copper, molybdenum, nickel, tin, vanadium and zinc
- Spent plating solutions, sludges, residues and grindings
- Onsite hazardous waste treatment capabilities for other non-recyclable materials

Value of Our Metals Recovery

- Sustainable
- Rebate potential from recovered materials
- Verified recycler eligible for RCRA exemption
- Reduce liability
- Turnkey solutions
