

PFAS Solutions for Municipalities

PFAS management solutions that help municipalities stay compliant, protect the environment, and keep communities safe.

REPUBLIC
SERVICES

Sustainability in Action

Republic Services is an industry leader in environmental solutions, recycling and waste. With our nationwide reach, we've been partnering with municipalities across the country for decades to protect the environment and keep communities safe and clean.

As regulations change, municipalities now face a diverse set of PFAS-related challenges including landfill leachate management, AFFF system decommission, soil remediation, and filter cake/biosolid disposal.

We serve multiple departments within municipalities, including:

Municipal
Landfill

Wastewater
Treatment Plants

Fire
Departments

Municipal
Airports

Our Capabilities

- RCRA Subtitle C & D Landfills
- Supercritical Water Oxidation (SCWO)
- Injection Wells, Class I & II
- Thermal Desorption Unit (Soil)
- Wastewater Treatment including Foam Fractionation, GAC, Reverse Osmosis, Ion Exchange Resin

Accepted Waste Streams

- Landfill Leachate
- AFFF Concentrate and Rinsate
- PFAS Soil Remediation
- Filter Cake/Biosolid Disposal

Benefits

- **A single partner** from analysis to final disposal
- **PFAS expertise**, in partnership with Battelle
- **Access to all 3 EPA-recognized** PFAS disposal methods
- **Decades of experience**, millions of tons of PFAS managed
- **Safe and compliant** with evolving regulatory frameworks
