

# Pool Chemical Disposal

Republic Services offers safe and compliant disposal solutions for containerized pool chemicals.

**REPUBLIC**<sup>®</sup>  
SERVICES

Sustainability in Action

## Republic Services' stabilization facility provides a cost-effective alternative treatment technology to incineration.

We safely treat and dispose of a variety of pool chemicals including calcium hypochlorite, brominated oxidizers and most compounds sold for commercial and residential use.

We accept containerized materials in powder, granular or tablets and offer compliant storage solutions prior to disposal. State-of-the art equipment allows us to safely downsize the materials, including tablets, to safely treat them.

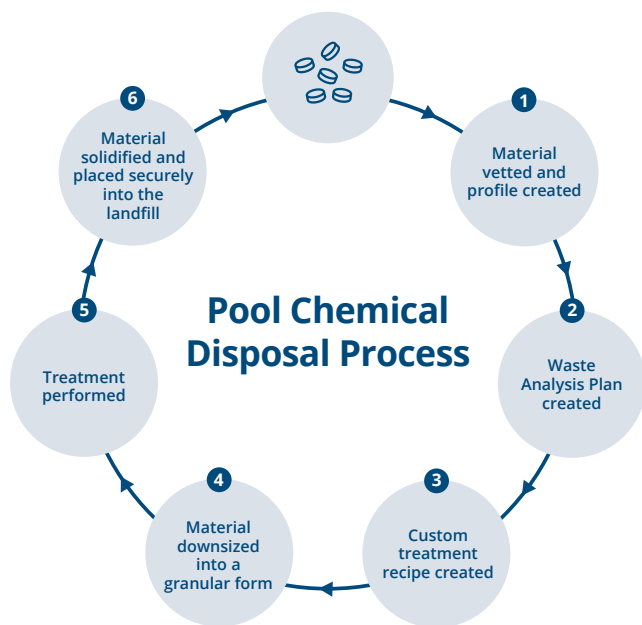

Large capacity equipment

Cost-effective alternative to incineration

Facility designed to safely treat pool chemicals

## Republic Services' Value of Pool Chemical Disposal

Onsite lab and professionally trained chemists

Ability to store material prior to disposal

Dedicated and rigorously maintained equipment
