

Thermal Desorption Solutions

Republic Services provides sustainable waste solutions for recoverable organic materials.

REPUBLIC
SERVICES

Sustainability in Action

Republic Services is a leader in environmental services. Our Thermal Desorption Unit (TDU) offers an alternative to incineration, stabilization and landfill. Our Robstown Facility in Texas maintains an RCRA permit, which enables us to operate as a Verified Recycler under RCRA, making customers potentially eligible to reduce their liability and cost by granting their outbound waste streams exemption from RCRA regulations.

600+ federal and state waste codes accepted

Innovative recycling solutions

Advanced treatment technologies

Transparent pricing

Hazardous and non-hazardous waste disposal

Compliance and safety

Thermal Desorption Solutions

- Organic-bearing waste from petroleum, petrochemical, ethylene processing and other manufacturing practices
- Organic-bearing liquids, sludges and solids
- Metal-bearing catalysts
