Wastewater Treatment Services

Republic Services manages your industrial wastewater treatment needs for non-hazardous industrial waste. We achieve regulatory compliance, while treating more than 100 million gallons of wastewater annually.

Wastewater Treatment Solutions

Our network of owned-and-operated wastewater treatment facilities processes a wide array of regulated waste streams from landfills, manufacturing plants and industrial sites.

- Transportation fleet for large- and small-scale wastewater delivery
- Wastewater treated and discharged to meet all POTW requirements
- Solids recovered, recycled, reused or solidified and disposed of in our network of local Subtitle D landfills
- Subtitle D leachate sent back to CWT for treatment or sequestration

Our Capabilities

- Physical, chemical and biological treatment
- Oil-water separation
- Dissolved air floatation technology
- Rail car tank wash capabilities
- Aerobic treatment
- Filter press
- Large capacity at multiple locations
- Treatment technologies include separation, recovery, reverse osmosis, reuse or solidification
- Injection well disposal

Accepted Waste

Non-hazardous industrial waste, including:

- Inorganic
- Oily and organic regulated waste
- PFAS-contaminated waste

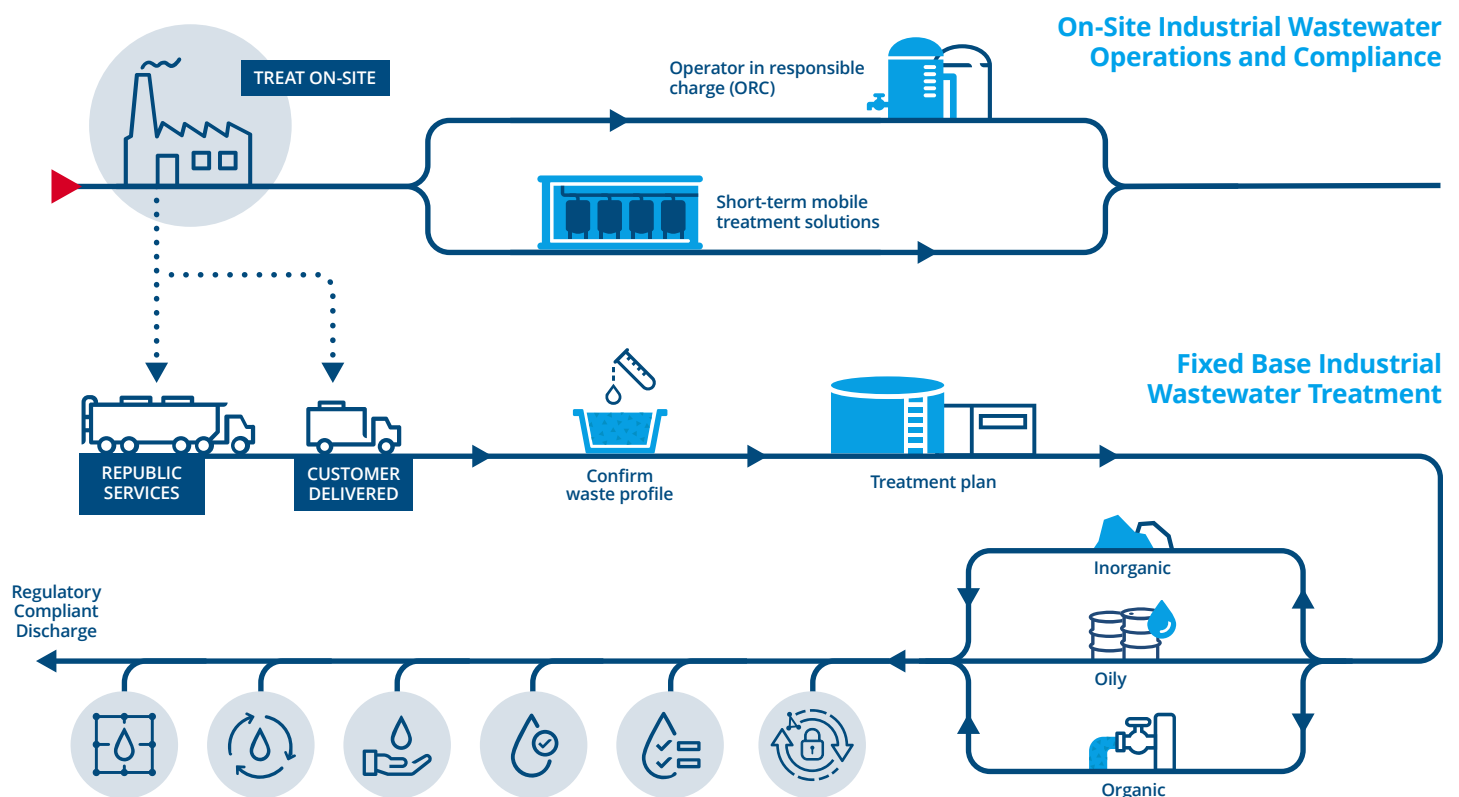

Various non- hazardous concentrations of:

- Metal
- Acid
- Base organic
- Cyanide
- Suspended solids
- Petroleum-contaminated water
- Latex/water-based paints
- Industrial process waste
- Tank rinse
- Used oil

Benefits

- ▶ Nationwide network of permitted treatment and disposal facilities
- ▶ Highly trained experts and safe practices ensure compliance
- ▶ Large acceptance capacity for projects of any size
- ▶ On-site Lab ensures quick results and compliance
