SERVICES

Sustainability in Action

Large fleet supports projects of any size

End-to-end PFAS solution with closed loop sequestration

Regulatory compliance

In-house lab

Wastewater Treatment Services

Republic Services manages your industrial wastewater treatment needs for hazardous and non-hazardous industrial waste. We achieve regulatory compliance, while treating more than 100 million gallons of wastewater annually.

Wastewater Treatment Solutions

Our network of owned-and-operated wastewater treatment facilities processes a wide array of regulated waste streams from landfills, manufacturing plants and industrial sites.

- Transportation fleet for large- and small-scale wastewater delivery
- Wastewater treated and discharged to meet all POTW requirements
- Solids recovered, recycled, reused or solidified and disposed of in our network of local Subtitle D landfills
- Subtitle D leachate sent back to CWT for treatment or sequestration

Our Capabilities

- Physical, chemical and biological treatment
- Oil-water separation
- Dissolved air flotation technology
- Rail car tanker washout
- Aerobic treatment
- Filter press
- Injection well
- Internal tank wash/decontaminate
- Anaerobic digestion
- Pump and haul oil field domestic wastewater
- Large capacity at multiple locations

Accepted Waste

Hazardous Waste Streams

- Acids
- Bases
- Plating waters
- Oxidizing liquids-
peroxide, bleach
- Organic wastewater
- F039 leachate
- Delisting liquids
(F006, F007, F008,
F009, F011, F012,
F019, K062)

Non-Hazardous Waste Streams

Various non-hazardous concentrations of:

- Metal
- Acid
- Base organic
- Cyanide
- Suspended solids
- Petroleum-
contaminated water
- Latex/water-based
paints
- Industrial
process waste
- Tank rinse
- Used oil

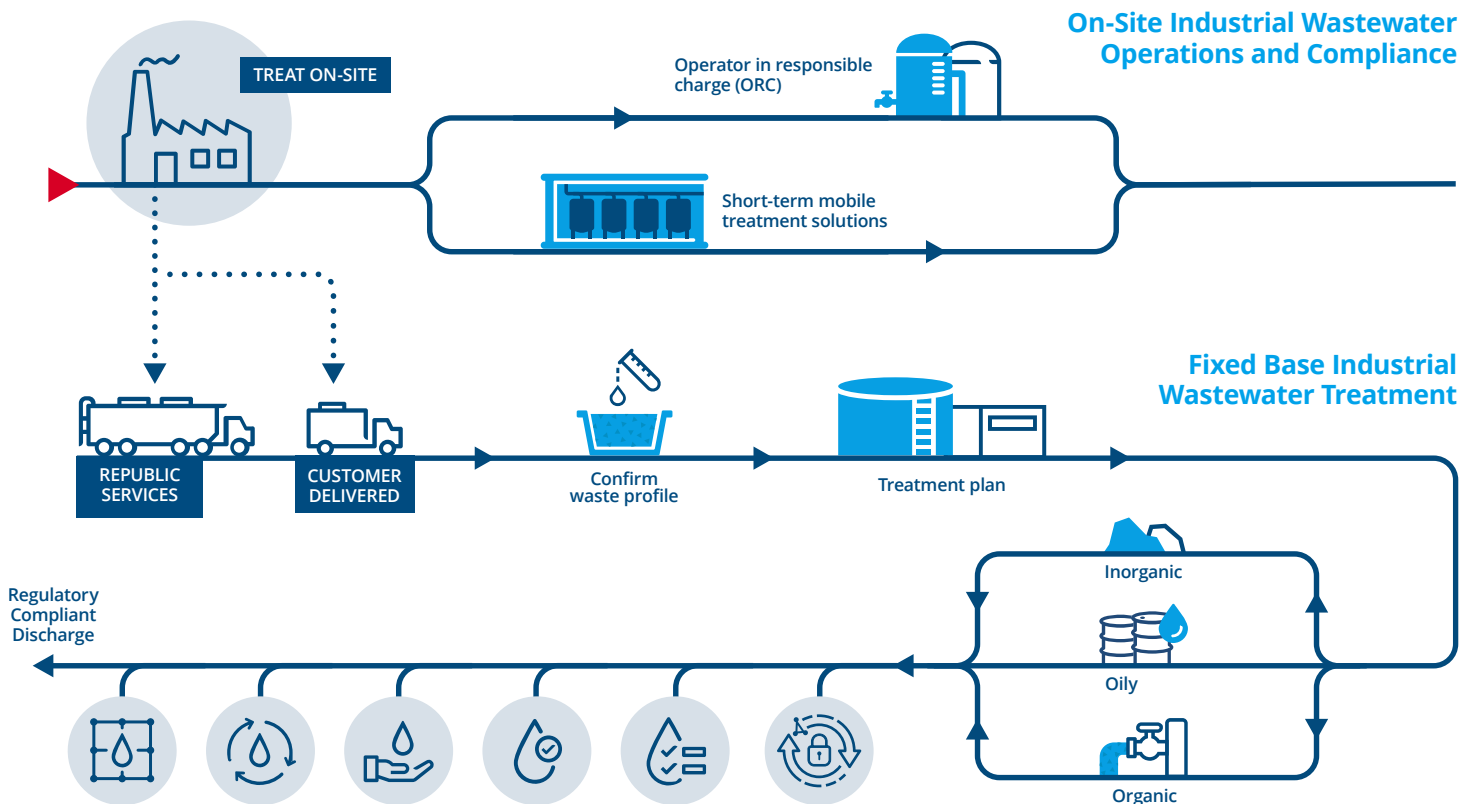

Non-hazardous industrial waste, including:

- Inorganic
- Oily and organic
regulated waste
- PFAS-contaminated
waste

Benefits

- ▶ Nationwide network of permitted treatment and disposal facilities
- ▶ Highly trained experts and safe practices ensure compliance
- ▶ Large acceptance capacity for projects of any size
- ▶ On-site lab ensures quick results and compliance
