

## Businesses, Condos, and Apartments

Senate Bill (“SB”) 1383 requires businesses and multifamily properties to:

1. Subscribe to and participate in organics and recycling curbside collection service or self-haul organics to an appropriate facility for diversion.
2. Provide organics and recycling collection services for employees, tenants, contractors and customers and organics and recycling receptacles in all areas where landfill containers are provided for customers (*not required in restrooms*).
3. Internal receptacles must conform to proper color and labeling requirements. Group color-coded receptacles into stations: Use green for compost/organics, blue for recycling, and black or gray for garbage/landfill. Functional receptacles purchased before January 1, 2022 do not have to be replaced prior to January 1, 2036 or the end of its useful life. However, they should be clearly labeled for each material stream.
4. Reduce contamination by annually providing information to employees, contractors, tenants, and customers about the law, including sorting requirements. Provide information to new tenants within 14 days of move-in.
5. Periodically:
  - a) Inspect waste receptacles for contamination;
  - b) Inform employees if receptacles are contaminated;
  - c) Instruct employees about how to properly sort material into the correct receptacles
6. Supply and allow access to an adequate number, size, and location of receptacles with the correct labels or receptacle colors.
7. Employees, contractors, customers, and tenants must properly sort organic materials into the correct receptacles.

## Technical and Educational Assistance

Need help making sure you are in compliance with SB 1383 or just want to improve your recycling and organics programs? Republic Services can provide educational material, posters, employee trainings, waste assessments, and program support at no additional cost. Contact April Canavan, Sustainability Advisor, at [925.316.9455](tel:925.316.9455) or [ACanavan@RepublicServices.com](mailto:ACanavan@RepublicServices.com).

## Food Recovery

To reduce food waste sent to landfill and help address food insecurity, SB 1383 requires certain food generators to recover and donate surplus edible food to feed people. The law directs the following:

- Tier 1 and Tier 2 food generators required to recover edible food include supermarkets, grocery stores, food distributors, health facilities, hotels, large events, and more.
- Food generators must arrange to recover the maximum amount of edible food that would otherwise be disposed.
- Food recovery organizations and services that participate in SB 1383 must maintain records. For more information, visit [RepublicServices.com/MartinezCA](http://RepublicServices.com/MartinezCA) or use this QR code.

## Self-Haul Reporting

Commercial businesses, including landscapers, that wish to self-haul their organic waste, are required to source separate food waste and landscaping from garbage. Businesses are also required to keep records. To assist self-haulers with recordkeeping, CalRecycle has developed a tool.

Visit [CalRecycle.ca.gov/organics/slcp/recordkeeping](http://CalRecycle.ca.gov/organics/slcp/recordkeeping) to download the form.

## Reducing Single-Use Foodware Accessories

Assembly Bill (“AB”) 1276, requires all retail food facilities and food delivery platforms to provide single-use foodware items **upon request only**. This law was established to help reduce the amount of waste generated by single-use items and to encourage consumers to choose reusables.

AB 1276 includes all single-use items, including those made from bioplastics, compostable plastic, bamboo, and paper.

Single-use foodware accessories include:

1. Utensils (*forks, knives, spoons, and sporks*)
2. Chopsticks
3. Condiment cups and packets (*such as relishes, spices, sauces, confections, or seasoning, ketchup, mustard, mayonnaise, soy sauce, hot sauce, salsa, salt and pepper, sugar and sugar substitutes*)
4. Straws
5. Stirrers, splash sticks, and cocktail sticks

To reduce waste, AB 1276 requires retail food facilities and food delivery platforms to:

- Only provide single-use accessories to consumers upon request
- Only provide single-use accessories required to eat the ready-to-eat food
- NOT bundle single-use accessories or condiments so a consumer has to take more items than desired

Retail food facilities and food delivery platforms may still use:

- Dispensers of unwrapped single-use foodware accessories that are self-serve
- Standard condiments that are self-serve
- Bulk dispensed condiments

All single-use plastic utensils belong in the landfill, including those labeled compostable. Only bamboo utensils are accepted in green organics receptacles.

# Multifamily Apartment/Condominium Clean-up Voucher Program

**Attention Apartment/Condominium Residents:** Do you have extra bags of trash, or a dresser or mattress to dispose of? Each Martinez multifamily resident can pick up a free voucher, which allows for disposal of up to one cubic yard of solid waste material at the Transfer Station at **951 Waterbird Way, Martinez**. No appliances, e-waste, hazardous waste, or treated wood allowed. Use the RE:Source guide at [StopWaste.org](http://StopWaste.org) for safe disposal options for items excluded from the Voucher Program.

**Each resident must pick up their OWN voucher from the Republic Services front office, located at 441 N Buchanan Circle, Pacheco, 94553.** Please bring photo ID and proof of residency.

**Property owners/managers:** Please inform your tenants about this program. Property owners/managers cannot collect vouchers on behalf of tenants.
